// Courses

- ◊ Data Structures & Algorithms
- ◊ Web Development

// Languages

- ◊ Kazakh: C1 (native)
- ◊ Russian: B1
- ◊ English: B1+
- ◊ Turkish: A2

// Education

University: SDU University
/* 2022.09 – present */
Major: Information Systems
Type: Grant
Degree: 3 course

School: 125 High School
/* 2021.11 – 2022.06 */
UNT (EHT): 114

// Projects

<h1> Todoshka </h1>
/* [link to project](#) */
Description: This project is a simple ToDo list application built with React. It includes functionalities to manage tasks such as adding, editing, checking, and deleting todos.

<h2> Salkyn Samal </h2>
/* [link to project](#) */
Description: A sleek weather app built with React, providing users with accurate weather forecasts. Features city search, location-based updates, and dark mode toggle for a user-friendly experience.

<h3> Qonaq Bol </h3>
/* [in the process](#) */
Description: A web platform for restaurants and 'Toihana' owners to manage guest invitations for Kazakh events like weddings and circumcisions. Built with React (mobile-first) and Java Spring for efficient performance and scalability.
